

ANUJ JOSHI

AI/ML Engineer | LLM Agents, RAG, Knowledge Graphs, Data Pipelines

New Delhi, India |  Portfolio |  GitHub |  anujjoshi.ae@gmail.com |  LinkedIn |  9811184995

Experience

Kohlberg Kravis Roberts

April 2026 – Present

Software Engineer | LangGraph, PySpark, Dagster, Ontology

Gurugram, Haryana

- Built an **AI code-intelligence agent** that crawls and maps **multiple enterprise trading applications** into a unified **knowledge graph**, accelerating developer onboarding and code discovery.
- Engineered **distributed entity-resolution and ontology-enrichment pipelines** over enterprise reference data, improving data consistency and scalability across internal platforms.
- Designed production **LLM and data-engineering workflows** for metadata extraction, ontology management, and automated knowledge retrieval, improving operational efficiency and maintainability.

QuickIntell

June 2025 – March 2026

Full Stack Developer Intern | React, LangChain, FastAPI, AWS

Remote

- Built a **denial-resolution AI agent** and claim-processing automation system that parses **EDI/ERA** data, reducing manual billing effort and accelerating root-cause analysis.
- Unified **5+ health services** across multiple **clearinghouses** for **Revenue Cycle Management** via a centralized MCP layer.
- Reached **HIPAA and SOC 2 readiness** by mitigating **15+ critical vulnerabilities** with **AWS KMS encryption** and least-privilege **IAM** policies.

ITP Electronics Pvt. Ltd.

May 2024 – July 2024

Software Developer Intern | Python, PyTorch, OpenCV, PaddleOCR

Gurgaon, Haryana

- Achieved **88% OCR data-extraction accuracy** on low-quality industrial labels with a custom **OCR pipeline** and rule-based regex parsing.
- Reduced **manual BOM-generation effort by 40%** by building an automated **wire-harness detection** system for industrial part identification.

Projects

ChatUI – AI Chatbot Library | React, FastAPI, LangGraph, Pgvector, MCP, SSE

- Engineered an **embeddable multi-agent chat interface** with agent switching, follow-up prompting, contextual conversations, real-time streaming, and voice (STT/TTS).
- Designed a **multi-agent RAG architecture** with MCP integration over GitHub and competitive-programming data for enriched, context-aware responses.
- Built **automated ingestion pipelines** with GitHub Actions for continuous sync and retrieval over **500+ Notion** documents.

Ekalavya – AI-Powered EdTech Platform | FastAPI, Supabase, Multi-LLM Orchestration, AI Voice

- Built a **high-concurrency EdTech SaaS** supporting **80+ simultaneous users** per virtual classroom with Supabase real-time subscriptions and FastAPI async processing.
- Implemented a **multi-LLM orchestration layer** that routes between proprietary and open-source models for personalized learning paths and adaptive multilingual content.
- Designed a **real-time teaching interface** powered by an **AI voice agent** for automated student doubt resolution and dynamic lecture delivery.

Technical Skills

Languages: C++, Python, TypeScript, JavaScript

AI/ML: PyTorch, TensorFlow, Transformers, OpenCV, LangChain, LangGraph, LLM RAG, MCP

Data & MLOps: PySpark, Dagster, Kafka, Pinecone, ChromaDB, Pgvector, GitHub Actions

Web Development: React.js, Next.js, Node.js, Express.js, FastAPI, REST APIs, GraphQL

Cloud, DevOps & Databases: Docker, Linux, CI/CD, AWS, Terraform | PostgreSQL, MySQL, MongoDB, Redis

Education

Delhi Technological University

2022 – 2026

B.Tech. in Computer Science, Minor in Machine Learning

CGPA: 9.25 / 10.0

Achievements & Leadership

Competitive Programming: LeetCode 1941+, Knight | Codeforces 1434+, Specialist | CodeChef 1731+, 3 Star

Innovate & Inspire (Season 13): Achieved **1st rank** among **500+ teams nationwide**.

General Secretary, SR-DTU: Supervised operations including **INVICTUS**, oversaw **50+ members** and **15+ events**.
